GLOBUS, COSMOS & AVALON WATERWAYS UPDATE COVID-19 VACCINE POLICY

12 September 2022 – This week, the Globus family of brands announced that it will lift its policy requiring all guests to be fully vaccinated against COVID-19. Guests booking a holiday that begins on or after 1 March 1 2023, will no longer need to be vaccinated against COVID-19 to travel on a Globus or Cosmos tour or Avalon Waterways cruise.

Of this policy change, the Globus family of brands' UK CEO Giles Hawke said the following, "The health and safety of our guests remains our top priority and while we highly recommend that travellers are vaccinated against COVID-19, after 1 March 1 2023, we will no longer require it. Destinations and other transportation operators – like airlines – have their own rules and regulations. It will be up to the responsibility of our guests to understand and comply with those policies to move freely across the globe."

The Globus family of brands previous policy – requiring all guests be vaccinated against COVID-19 – remains in effect until 1 March 2023. Anyone traveling before that date on a Globus, Cosmos or Avalon Waterways holiday must be fully vaccinated.
